

MIOSHA GENERAL INDUSTRY PART 39. 'DESIGN SAFETY STANDARDS FOR ELECTRICAL SYSTEMS'

The revised standard strengthens employee protections and adds consistency between OSHA's requirements and many state and local building codes which have adopted updated National Fire Protection Association (NFPA) 70, which is based on the 1999 edition National Electrical Code. The updated standard includes an alternative method for classifying and installing equipment in Class I hazardous locations, new requirements for ground-fault circuit interrupters, and new provisions on wiring for carnivals and similar installations.

These are the first changes to the electrical installation requirements in 25 years.

The following is the June 27, 2007 Amendments (as written)
